Print Your Dreams

You dream, we print...

Silbonit Fancy Fibercement

Silbonit Fancy guarantees to designers and architects the etraordinary possibility to espress their creativity and imagination.

Directly on a Silbonit through-coloured panel is now possible to reproduce any type of personalized image, decoration or effect.

Wood Design

Silbonit Fancy Wood is now available in 8 different designs.
The new range consists of wood finishes that meet the most demanding architectural requirements.
The available wood finishes are characterised by both light and dark shades, and by continuous and lively patterns.
Silbonit Fancy Wood brings the warmth and elegance of wood to a fibre-cement panel utilised in an interior and exterior applications.
The exceptionally realistic visual effect and its limited environmental impact make it an interesting product.

Marble Design

Silbonit Fancy Marble range consists of 3 types of finishes that can be offered in a matt or a gloss variety.
Marble is one of the most valuable, elegant and timeless materials used in construction.
The precious marble effect is digitally reproduced on a much thinner Silbonit panel, which is largeer in size and light-weight that allows easy handling and installation.

Stone Design

Silbonit Fancy Stone offers 4 different designs in its new range.
Stone is one of the oldest material used worldwide to realize impressive architectural works, such as the Colosseum, the Great Wall of China and many others.
Although construction methods have changed over time, stone remains one of the most aesthetically appreciated material.
Silbonit Fancy Stone allows you to relive the historicity and beauty of this material through an extraordinary digital reproduction process. The rough surface combined with natural finishes gives the sensation of looking at a real stone product.

Nominal dimensions available - mm

Brick Design

Exposed brick wall is part of the building culture of many countries around the world that has maintained tradition over the years.
Silbonit Fancy – Brick; was created with the aim of preserving its origins in countries where bricks are an essential aesthetical factor, while offering the advantage of eco-sustainable benefits of a ventilated façade.
Brick design is one of the most popular patterns among architects in recent years. It perfectly fits the modern "Industrial" style, where the skeleton of the building is enhanced.

Rust Design

Silbonit Fancy Rust collection is perfectly suited to the modern "industrial" architectural style, through which architects wish to anticipate the flow of time by offering a wild and lived-in finish. Like the other designs, the reproduction is done digitally on a Silbonit panel that fits into the eco-sustainable context of the ventilated façade as well as the interior linings.

Nominal dimensions available - mm

2500 x 1200	3000 x 1250
2500 x 1250	3050 x 1200

Silbonit Fancy
Features

Silbonit Fancy, produced in compliance with EN 12467:2012+A2:2018, can be applied for ventilated facades and interior linings. Silbonit Fancy is also available in FP (Fire Rated) Product.

Silbonit Fancy, like all the Silbonit products, has a fantastic fire proof behaviour: it's classified as A2 s1 d0. Silbonit Fancy is also available in FP version and consequently it is classified as an A1 product.

Silbonit Fancy is UV tested in compliance with UNI-EN 1062-11:2003

Silbonit Fancy is maintenance free.

Silbonit Fancy
Features

Silbonit Fancy is antigrafitti: the empirical tests carried out have shown that graffiti can be removed.

Silbonit Fancy is available in 2 finishes: Matt and Gloss.

Silbonit Fancy is an eco friendly product: the possibility to reproduce any kind of wood, stone or marble decor, limits significantly the human impact on the environment.
